Professional Profile

Motivated Computer Science and Mathematics graduate with practical experience in IT support, systems administration, network troubleshooting, software development, and database management. Skilled in supporting computer systems, resolving technical issues, developing web-based applications, and working with programming and networking tools. Possesses strong analytical, problem-solving, communication, and teamwork skills. Seeking an entry-level opportunity in software development, IT support, systems administration, networking, data analysis, or related technology roles.

Key Skills

- Programming knowledge in Python, Java, C++, JavaScript, HTML, CSS, React, and Node.js.
- Understanding of software development principles, object-oriented programming, algorithms, and web development.
- Experience supporting computer hardware, software, networks, user accounts, and technical troubleshooting.
- Knowledge of computer networking concepts including TCP/IP, routing, switching, subnetting, DNS, DHCP, and network security basics.
- Familiar with database design, querying, and management using MySQL and SQLite.
- Exposure to cloud technologies and version control tools, including AWS, Google Cloud, Git, and GitHub.
- Basic knowledge of machine learning concepts, data analysis, TensorFlow, and PyTorch.
- Strong problem-solving, documentation, teamwork, time management, and technical communication skills.

Professional Experience

IT Officer

Eswatini

Interoute Group of Companies

1.5 Years

- Provided day-to-day technical support to staff by resolving hardware, software, network connectivity, and user-access issues.
- Installed, configured, updated, and maintained computer systems, applications, printers, and related IT equipment.
- Assisted with network setup, connectivity troubleshooting, system monitoring, and basic security checks.
- Supported the maintenance of user accounts, system records, support logs, and technical documentation.
- Worked closely with staff from different departments to identify technical needs and provide practical solutions.
- Assisted in improving the reliability and availability of IT systems to support smooth business operations.

Education

University of Eswatini **2021 – 2026**

Bachelor of Science in Mathematics and Computer Science

- Relevant Computer Science courses: Algorithms, Database Systems, Computer Networks, Object-Oriented Programming, Web Development, Software Engineering, and Artificial Intelligence.
- Relevant Mathematics courses: Numerical Analysis, Linear Algebra, Calculus, Optimisation Theory, and Mathematical Statistics.

State University of Nizhny Novgorod, Russia **2016 – 2019**

Undergraduate Studies in Mathematics and Computer Science

Mutambara High School **2010 – 2015**

A-Level and O-Level

Projects

AI-Enhanced Wireless Mesh Network for Mine Safety **2025**

Final Year University Project

- Designed an AI-enhanced wireless mesh network concept for real-time communication and safety monitoring in underground mines.
- Developed a machine learning-based predictive model for identifying potential safety hazards using LSTM architecture.
- Applied networking, programming, data analysis, and system design concepts to improve communication reliability and safety monitoring.

Waste Collection Management Application **2023**

Personal Project — GitHub: iArthur04

- Developed a full-stack web application to support waste collection scheduling and logistics management.
- Implemented features for scheduling, location-based service coordination, and data storage.
- Strengthened practical skills in web development, database management, application design, and deployment.

Certifications

- HEXCO National Foundation Certificate in Computer Operations.
- Cisco networking knowledge gained through academic study and practical simulations using Cisco Packet Tracer.

Technical Tools

- **Programming:** Python, Java, C++, JavaScript, HTML, CSS.
- **Web Development:** React, Node.js.
- **Databases:** MySQL, SQLite.
- **Networking:** TCP/IP, subnetting, routing and switching fundamentals, Cisco Packet Tracer.
- **Cloud and Version Control:** AWS, Google Cloud, Git, GitHub.
- **AI and Data Analysis:** TensorFlow, PyTorch, introductory machine learning concepts.

Languages

- English – Fluent
- Shona – Fluent
- Siswati – Conversational
- Russian – Conversational

Interests

Software development, artificial intelligence, data analysis, cybersecurity, cloud computing, networking, open-source projects, and hackathons.
